

Luis Gabriel Niño Brijaldo

Systems Engineer & Operations Automation Specialist

Vancouver, BC | +1 (672) 338-2258 | gabrielnino@gmail.com |
www.linkedin.com/in/luis-nino-developer

Professional Summary

Systems Engineer with 18+ years of professional experience designing scalable data architectures, workflow automations, and digital tracking systems. Expert at identifying operational bottlenecks and transforming chaotic, manual activities into structured, high-efficiency processes. Specializes in leveraging data engineering (Snowflake, Hive), CRM tracking, and advanced SEO to predict customer behavior and execute high-conversion local marketing strategies. Combines deep technical execution with real-world local community leadership and high-intensity physical labor. Proven capacity to streamline field logistics, manage field-to-digital workflows, and drive hyper-accelerated community growth.

Core Competencies & Skills

- Operational Systems: Process Mapping, Resource Optimization, Automated Data Logging, Inventory & Order Workflow Tracking.
- Data & CRM Strategy: Customer Behavior Projections, CRM Management, Data-Driven Marketing, Snowflake, Hive, Advanced Local SEO.
- Community Leadership: Social Media Management, WhatsApp/Instagram Community Scaling, Local Event Logistics, Team Supervision.
- Physical Operations: Demanding outdoor labor, small machinery handling, landscaping maintenance, quality control sorting.

Selected Professional Experience

Fiebre Amarilla en Vancouver – Community Founder & Organizer

June 19, 2026 – Present | Vancouver, BC

- Built, launched, and scaled a local grassroots community network from 0 to 907 active members in exactly 7 days.
- Implemented rapid-growth digital marketing tactics and communication structures across WhatsApp and Instagram platforms.
- Managed real-time crowd logistics, public relations, and local coordination for high-impact event gatherings.
- Proof of Traction: Insert image 1000181950.png before exporting if visual evidence is required.

Modena Tilling – Landscape Laborer & Team Supervisor

October 2025 – Present (8 Months) | Lower Mainland, BC

- Executed daily physically demanding outdoor logistics, property maintenance, and precision heavy equipment handling.
- Supervised an operational field team of two, optimizing shift pacing to meet project timelines.
- Applied structured data tracking to monitor resources, inventory, and team performance.

Snowflake – Senior Software Developer (Data & Automation Engineering)

November 2021 – Present | Vancouver, BC

- Architected automated migration systems for 300+ clients, saving up to six months of manual effort per project.
- Utilized Hive and Snowflake to optimize workflows and project behavior trends.
- Led Agile coordination and rapid product delivery.

MAS Global – Senior Software Developer

July 2021 – November 2021

- Designed an automated budgeting and pricing application improving quoting accuracy by 40%.

El Tiempo Casa Editorial / Software One – Senior Systems Engineer & SEO Specialist

July 2009 – December 2013

- Moved competitive keywords from page 3 to page 1 on Google, increasing organic CTR by 50%.
- Scaled platform usage from 300M to 400M annual hits.

Education

- B.Sc. in Systems Engineering – Universidad Distrital Francisco José de Caldas (Graduated July 2009).
